

Business Problem

Effective inventory and sales management are critical for optimizing profitability in the retail and wholesale industry. Companies need to ensure that they are not incurring losses due to inefficient pricing, poor inventory turnover, or vendor dependency. The goal of this analysis is to:

- Identify underperforming brands that require promotional or pricing adjustments.
- Determine top vendors contributing to sales and gross profit.
- Analyze the impact of bulk purchasing on unit costs.
- Assess inventory turnover to reduce holding costs and improve efficiency.
- Investigate the profitability variance between high-performing and low-performing vendors.

Negative & Zero Values:

Gross Profit: Minimum value is **-52,002.78**, indicating losses. Some products or transactions may be selling at a loss due to high costs or selling at discounts lower than the purchase price.

Profit Margin: Has a minimum of $-\infty$, which suggests cases where revenue is zero or even lower than costs.

Total Sales Quantity & Sales Dollars: Minimum values are **0**, meaning some products were purchased but never sold. These could be slow-moving or obsolete stock.

Outliers Indicated by High Standard Deviations:

Purchase & Actual Prices: The max values (**5,681.81 & 7499.99**) are significantly higher than the mean (**24.39 & 35.64**), indicating potential premium products.

Freight Cost: Huge variation, from **0.09** to **257,032.07**, suggests logistics inefficiencies or bulk shipments.

Stock Turnover: Ranges from **0** to **274.5**, implying some products sell extremely fast while others remain in stock indefinitely. Value **greater than 1** indicates that the sold quantity is higher than the purchased quantity, possibly due to sales being fulfilled from older stock.

Data Filtering

To enhance the reliability of the insights, we removed inconsistent data points where:

- Gross Profit ≤ 0 (to exclude transactions leading to loss).
- Profit Margin ≤ 0 (to ensure analysis focuses on profitable transactions).
- Total Sales Quantity = 0 (to eliminate inventory that was never sold).

Correlation Insights

Purchase Price vs. Total Sales Dollars & Gross Profit: Weak correlation (-0.012 and -0.016), indicating that price variations do not significantly impact sales revenue or profit.

Total Purchase Quantity vs. Total Sales Quantity: Strong correlation (0.999), confirming efficient inventory turnover.

Profit Margin vs. Total Sales Price: Negative correlation between (0.179) suggesting increasing sales price may lead to reduced margins, possibly due to competitive pricing pressures.

Stock Turnover vs. Gross Profit & Profit Margin: Weak negative correlations (0.038 and -0.055), indicating that faster turnover does not necessarily result in higher profitability.

This shows how much each vendor contributes to total purchases.

- The **bars (left axis)** show individual vendor contribution %. The highest is **DIAGEO (~16.3%)**, followed by others with smaller shares.
- The **red dotted line (right axis)** shows **cumulative contribution %**—how total builds up as you move across vendors.
- You can see a **few top vendors contribute a large portion** of purchases, while the rest add smaller increments.

4.Top Vendors by sales & Purchase Contribution

The top 10 vendors contribute 65.69% of total purchases, while the remaining vendors contribute only 34.31%. This over-reliance on a few vendors may introduce risks such as supply chain disruptions, indicating a need for diversification.

5.Impact of Bulk Purchasing on Cost Savings

UnitPurchasePrice	
OrderSize	
Small	39.068186
Medium	15.486414
Large	10.777625

Vendors buying in **bulk(Large Order Size)** get the **lowest unit price (\$10.78 per unit)**, meaning **higher margins** if they can manage inventory efficiently.

The price difference between Small and Large orders is **substantial(~72% reduction in unit cost)**

This suggests that **bulk pricing strategies** successfully encourage vendors to purchase in **larger volumes**, leading to **higher overall sales** despite **lower per-unit revenue**.

Slow-moving inventory increases storage costs, reduces cash flow efficiency, and affects overall profitability.

Identifying vendors with low inventory turnover enables better stock management, minimizing financial strain.

7.Profit Margin Comparison: High vs. Low Performing vendors

Top vendors' profit Margin (95% CI): (30.74%, 31.61%), Mean: 31.17%

Low vendors' profit Margin (95% CI): (40.48%, 42.62%), Mean: 41.55%

Low performing vendors maintain higher margins but struggle with sales volumes, indicating potential pricing inefficiencies or market reach issues.

Actionable Insights:

- Top-performing vendors: Optimize profitability by adjusting pricing, reducing operational costs, or offering bundled promotions.
- Low-performing vendors: Improve marketing efforts, optimize pricing strategies, and enhance distribution networks.

8.Statistical Validation of Profit Margin Differences

Hypothesis Testing:

H₀ (Null Hypothesis): No significant difference in profit margins between top and low-performing vendors.

H₁ (Alternative Hypothesis): A significant difference exists in profit margins between the two vendor groups.

Result: The null hypothesis is rejected, confirming that the two groups operate under distinctly different profitability models.

Implication: High-margin vendors may benefit from better pricing strategies, while top-selling vendors could focus on cost efficiency.

Final Recommendations

- Re-evaluate pricing for low-sales, high-margin brands to boost sales volume without sacrificing profitability.
- Diversify vendor partnerships to reduce dependency on a few suppliers and mitigate supply chain risks.
- Leverage bulk purchasing advantages to maintain competitive pricing while optimizing inventory management.
- Optimize slow-moving inventory by adjusting purchase quantities, launching clearance sales, or revising storage strategies.
- Enhance marketing and distribution strategies for low-performing vendors to drive higher sales volumes without compromising profit margins.
- By implementing these recommendations, the company can achieve sustainable profitability, mitigate risks, and enhance overall operational efficiency.
